

Clyde 2020 – a new vision for the Firth of Clyde Ecosystem

Context and Objectives

Context

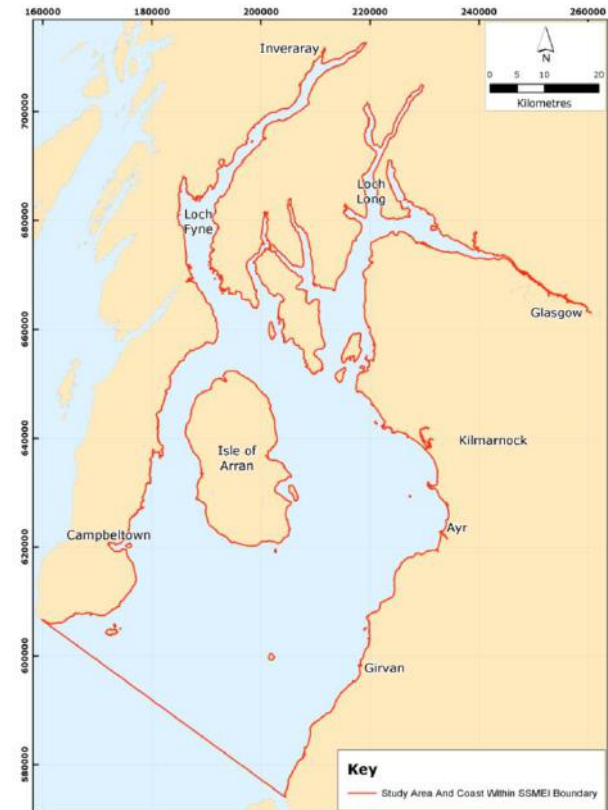

- Recent studies and reviews of the Clyde Ecosystem
- Our Seas – a shared resource: High Level Marine Objectives
- National and Regional Marine Planning in Scotland
- Outcomes of the Clyde 2020 Summit, April 2014

Objectives

- Take the opportunity to engage, discuss and encourage participation in delivery
- To create the Clyde 2020 Action Plan based on stakeholders priorities

Clyde 2020 – The Vision

The Firth of Clyde is a healthy and thriving marine ecosystem that is capable of adapting and mitigating for the challenges of climate change and supports sustainable fishing, tourism, leisure and other sustainable developments while offering protection to the most fragile species and habitats. This will enhance the quality of life for local communities and contribute to a diverse and sustainable economy for the West of Scotland.

Agreed at the Clyde 2020 Summit

Clyde 2020 Action Plan Framework

Basis – Selected High Level Marine Objectives

- Achieving a sustainable marine economy
- Ensuring a strong, healthy and just society
- Living within environmental limits
- Promoting good governance
- Using sound science responsibly
