Enterprise Neptune 50 years on: lessons for coastal management

Coastal Futures 2016

Enterprise Neptune 50 years on: lessons for coastal management

Key Messages

- Think for the long term
- Have good evidence
- Be ambitious
- Capture peoples imagination and harness public support

Dinas Oleu 1895

The first National Trust property

Fanny Talbot.....a vision for the coast

Nature under pressure at the coast – 1900-1920's

Pressure from housing – 1930's onwards

The advent of the sea side holiday

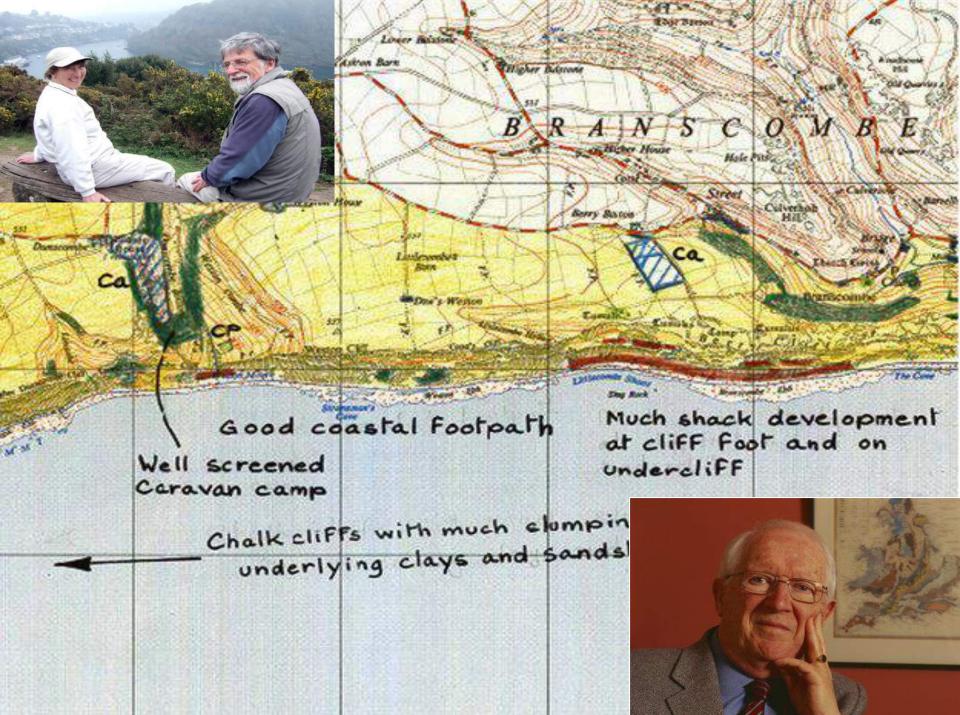

Mass transport

Over development of coastal regions

WEYMOUTH

Should or could we do anything about this?

1965 - Neptune Coastline Campaign

One third of the UK coastline developed 'beyond conservation'

To acquire outstanding coast line for permanent preservation

To alert people to the increasing pressure on our coastline

To raise £2m initially to buy unspoilt coastline

Our first Neptune purchase

•Whiteford Burrows - 1965

 Neptune funds allowed us to act quickly

•A supporter campaign with enormous appeal based on our love of the coast

31% considered their happiest childhood memory as being by the sea

26% often daydream about being by the sea when going about their everyday life

63% regard visiting the seaside or coast as important to their quality of life

775 miles – a quick tour

Rhossili, Gower

Conservation of historic landscapes and

Dunstanburgh, Northumberland

Acquisition of land which encourages nature to thrive

The Seven Sisters, East Sussex

Golden Cap, Dorset

Deepening our ownership – future proofing

Warren House Gill, Co. Durham

50 years of land use change at the coast

Protected coastline

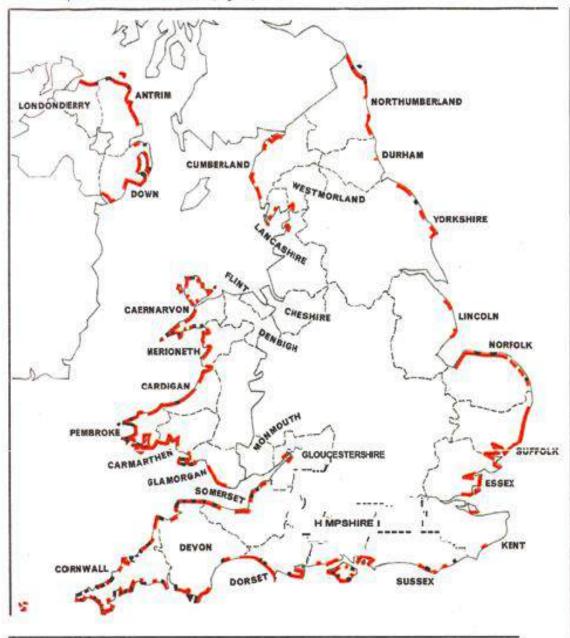

The original land use survey identified 3,342 miles of 'pristine land for permanent preservation'. Of this, the National Trust now looks after 649 miles out of a total of 775 miles in its care.

With the additional protection provided by Areas of Outstanding Natural Beauty (AONB), National Parks and Heritage Coast status, 2,422 miles are now protected from inappropriate development.

Adding in Sites of Special Scientific Interest (SSSIs) the total stretch of coastline in England, Wales and Northern Ireland which is considered 'protected' is 3,139 miles, equal to 94% of the coastline identified as 'pristine' in 1965.

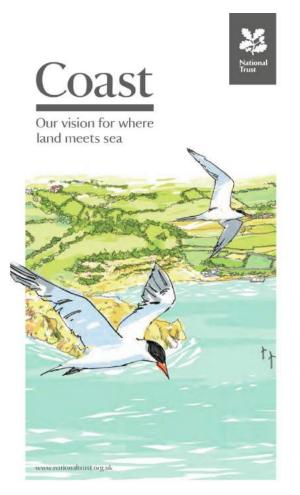

in 1965, the pristine areas for permanent preservation were drawn onto a single UK map reproduced in the Landon Blustrated News. The thick black stretches represent coast that was already owned by the National Trust, the thick red strips represent unspolit coastline that was considered to be pristine and in need of protection.

Reprined from The Illustrated LolIdon News, August 21, 1965

Playing our part at the coast

Healthy and adaptable

Rich in Wildlife

Enjoyed

Beautiful - working in partnership with others at a landscape scale

Rich in Culture - understanding the past to inform the future

Productive _ where complimentary
