Investing in Ocean Sustainability

About Blue Finance 2025

Ocean and Coastal Futures is introducing our inaugural Blue Finance event.

Momentum for investing in a sustainable ocean economy is growing, with public and private sector drivers requiring action to secure nature-positive outcomes. However, progress is held back by key challenges, including:

- How to develop a shared understanding between the finance sector and ocean sustainability practitioners to maximise investment impact
- How to scale ocean innovation and recovery to mobilise necessary finance
- How to measure the impact of investment on ocean sustainability outcomes
- How to amplify benefits of investment for local people and ensure they have a voice in decision-making, planning and implementation

Blue Finance 2025 will bring together government, ocean sustainability and finance specialists, academics and practitioners to explore how capital can be directed toward sustainable ocean initiatives. Through dialogue and collaboration between these communities, the conference aims to catalyse finance solutions that ensure returns on investment through protecting and restoring ocean health, and generating equitable outcomes for communities.

Day 1 - Wednesday 10th September 2025

- 13:15 **Finance spotlight: What investors need and want**
- Panel:**
- Gerrit Sindermann, Executive Director, Green Digital Finance Alliance
 - Ed Phillips, Managing Director, Future Planet Capital
 - Dr Pernille Høltedahl, Research Fellow, Centre For Climate Finance and Investment, Imperial College Business School
- Moderator:** Klaas de Vos, Founder, Ocean Fox Advisory
-
- 14:00 **Finance spotlight: How industry is investing in ocean sustainability**
- Panel:**
- Ben Green, Marine Restoration and Enhancement Manager, National Grid
 - Katrina Ross, Policy Director (Commercial & Governance), UK Chamber of Shipping
 - Tim Morris, Group Head of Corporate Communications, Associated British Ports
- Moderator:** Jennifer Godwin, CEO, Seabed User & Developer Group
-
- 14:45 Break
-
- 15:30 **Session 2: The scale imperative - mobilising capital for ocean recovery**
- What will it take to turn ambition into action and demonstrate that large-scale investment in ocean recovery is both viable and vital?
- Speakers:**
- Daniel Wilde, Head of Oceans, Commonwealth Secretariat
 - Dickon Howell, CEO, Howell Marine Consulting
- Panel:**
- George Birch, Founder, Oyster Heaven
 - Sarah Brown, Fund Manager, Scottish Marine Environmental Enhancement Fund (SMEEF)
 - Kirsty Schneeberger, Founder & CEO, Athena Blue
- Session Chair:** James Mansfield, Managing Director, Finance Earth
-
- 17:00 Day 1 close
-

Day 2 – Thursday 11th September 2025

9:00 **Welcome** **David Tudor**, Director, Ocean and Coastal Futures

9:10 **Keynote** **Torsten Thiele**, Founder, Global Ocean Trust

Session 3: Measuring what matters – tracking impact

Innovative approaches and tools to demonstrate measurable outcomes, ensuring that investments are both sustainable and accountable.

Speakers:

- Klaas de Vos, Founder, Ocean Fox Advisory
- Blanche de Biolley, Senior Analyst, TNFD

9:30

Panel:

- Melis Ford, Nature Engagement Lead, World Benchmarking Alliance
- François Mosnier, Head of Ocean Programme, Planet Tracker
- Prof. Michelle Devlin, Lead Advisor Marine Pollution and Water Quality, CEFAS
- Tom Brook, Ocean Conservation Specialist, WWF

Session Chair: Klaas de Vos, Founder, Ocean Fox Advisory

Finance spotlight: Public funds and ocean philanthropy in a world of blended finance

Panel:

- Morven Robertson, Funding Manager, Esmée Fairbairn Foundation
- Berry Mulligan, Seascapes Programme Manager, Endangered Landscape and Seascape Programme (ELSP)
- Kat Dawson, Blue Finance Mobilisation Team Lead, Defra

11:00

Moderator: Peter Lee, Head of Philanthropy and Partnerships, WWT

11:45 **Keynote** **Martin Koehring**, Ocean and Finance Specialist at the United Nations Environment Programme Finance Initiative (UNEP FI)

12:00 Lunch

Please note that timings and programming are subject to change

Day 2 - Thursday 11th September 2025

13:00 **Keynote** **Karen Sack**, Executive Director, ORRAA

13:15 **Session 4: Coastal communities - inclusive and equitable investment**

What innovative funding strategies and collaborative investment models can empower UK coastal communities? Spotlighting successful case studies, policy frameworks, and practical tools to help local leaders secure the resources they need to thrive.

Speakers:

- Kat Bruce, Founder, NatureMetrics
- Rebecca MacDonald-Lofts, Lead Officer, LGA Coastal SIG

Panel:

- Annie Breaden, Director of Corporate Operations, Crown Estate Scotland
- Alice Teague, Deputy Director, Welsh Government
- Wietse van der Werf, Founder and CEO, Sea Ranger Service

Session Chair: Sonali Siriwardena, Partner and Global Head of ESG, Simmons & Simmons

14:45 Break

15:15 **Finance spotlight: Innovation in financing**

Panel:

- Harry Wright, Founder & Director, Bright Tide / Ecotide
- Martha Pybus, Senior Associate, Finance Earth
- Cate Lamb, Co Executive Director, Blue Bond Accelerator

Moderator: James Merchant, Blue Economy Specialist, Marine Conservation Society

16:00 **Panel discussion: What's next for ocean finance? Pathways to 2030 and beyond**

Panel:

- Adonai Herrera-Martínez, Director, Environment and Sustainability, European Bank for Reconstruction and Development (EBRD)
- Chip Cunliffe, Sr. Director, Innovation & Pipeline Development, ORRAA
- Kaija Barisa, Senior Economist, Blue Marine Foundation

Moderator: Will Oulton, Vice Chair, Marine Conservation Society

16:45 Closing remarks

Please note that programming is subject to change

Blue Finance 2025

Investing in Ocean Sustainability

Event themes

Theme 1: Connecting finance and ocean sustainability

This theme focusses on strengthening collaboration between ocean managers, businesses and investors to improve ocean health as an underpinning foundation for social and economic prosperity.

- How can we support alignment between private sector ambitions and international and UK targets and commitments for ocean protection?
- How can emerging frameworks such as Marine Net Gain, TNFD, and nature positive approaches be designed to ensure investment returns, reduce regulatory burden and improve nature outcomes?
- How do we channel investment from economic sectors that rely on coastal and ocean resources to the right place at the right scale?
- How can finance and ocean sustainability practitioners develop a shared language and understanding to strengthen collaboration?

Theme 2: The scale imperative: mobilising capital for ocean recovery

Building investor confidence is essential to mobilise capital at the scale needed to deliver ocean restoration and conservation outcomes. This includes de-risking investment through science-based approaches, transparent governance, and to move beyond pilot projects to delivery at scale. This session will explore what it takes to turn ambition into action and demonstrate that large-scale investment in ocean health is both viable and vital.

- How can we de-risk investment to improve confidence?
- What are the emerging opportunities for investment in nature restoration?
- What is needed to develop a bankable project pipeline at a scale sufficient to mobilise the level of investment needed?

Theme 3: Measuring what matters - tracking impact

Robust metrics and transparent reporting are essential to assess the environmental, social, and economic impact of ocean-related investments. This includes moving beyond traditional economic indicators to include ecosystem health, community wellbeing, and climate resilience. We will spotlight innovative approaches and tools being used to demonstrate measurable outcomes, ensuring that investments are both sustainable and accountable.

- What do investors need to understand to provide assurance and track impact?
- What is the progress in defining metrics and monitoring frameworks to understand contribution to sustainability outcomes?
- How much data is enough and who is responsible for reporting? Can we achieve more through collaboration and data sharing?
- How can we make progress while ensuring a learning-based approach to address evidence gaps?

Theme 4: Unlocking funding pathways for resilient coastal communities

Our diverse coastlines provide unique challenges and opportunities for local communities who rely on the natural coastal and ocean resources for their livelihoods and wellbeing. This theme explores how we can amplify benefits for local people from investment and ensure they have a voice in investment decisions that impact the resources they rely on. From climate resilience and nature enhancement to economic regeneration, we'll spotlight successful case studies, policy frameworks, and practical tools for a thriving coastal future.

- What innovative funding strategies and collaborative investment models are there to empower coastal communities and ensure a thriving future underpinned by a healthy ocean?
- How can we ensure that coastal communities benefit from investment affecting their local area?
- How do we ensure inclusivity and equity for all in blue finance?
- How can we support communities in accessing sustainable finance for ocean related projects?

Ocean
and Coastal
Futures

About us

Ocean and Coastal Futures is on a mission to improve coastal and ocean management. We do this through convening, connecting and spreading knowledge. We are the home of OCF news, jobs and events, including the long-running Coastal Futures conference, which have been focal points for the UK ocean, coastal and water sectors for over three decades. Together with the Environment Agency, we have hosted the annual ReMeMaRe ocean restoration conference series since 2019, and we convene several online events focussed on ocean justice and sustainable ocean management.
